

Producing metal detectors for more than 10 years

12,000 units per month

Rechargeable metal detector,
can distinguish different metals

If you are looking for an experienced manufacturer of many types of metal detectors, you've struck gold. For the past 10 years, metal detectors have been our passion. Our catalog includes pass-through and handheld detectors for building security, military and police use, as well as searching for hidden treasures.

When security is at stake, quality can't be questioned. Our goods are compliant with the RoHS Directive and carry CE marks. A skilled QC team comprised of 20 employees, each with at least five years of experience, carefully examines products at all levels of production. Each product also undergoes a 24-hour burn-in test to ensure it works properly.

Our experienced R&D team members – some with more than 30 years of design experience – create three to five new products each month, but are also ready to work on your OEM projects. And with a capacity in excess of 12,000 units per month, we are ready to handle your volume orders. Inquire now.
